

SWISSPEARL® FIBER CEMENT RAINSCREEN

Libbie Mill Library - Richmond, VA

A Stunning Community Anchor for Richmond Virginia

Quinn Evans (BCWH) Architects has created cutting-edge designs of wonderful library spaces and Libbie Mill Library in Richmond, Virginia is a fine example of their work. Terracotta, fiber cement and fiber concrete rainscreens were all used to create this stunning community anchor. The library was one of the first buildings completed and has led to the growth of Richmond's suburb. Large fabricated Swisspearl® fiber cement panels were installed on a concealed aluminum ECO Cladding rainscreen system.

Panel Type: Swisspearl®
Architect: Quinn Evans (BCWH)
