

## TERRACOTTA RAINSCREEN

Lafayette College Theater – Easton, PA

*Terracotta Rainscreen for College Performance Center*

KSS Architects of Philadelphia started with the "ruins" of brick and stone and give birth to a new Terra5 terracotta rainscreen for the Lafayette College Theater. This new arts enclave allows both artists and audience to have a stunning new performance center to both work, learn and enjoy. The new building adjoins the Ahart Family Arts Plaza and the two buildings create an inspiring block for the arts. Two colors of large format terracotta panels are supported by ECO Cladding's aluminum sub-framing systems.

Panel Type: Terra5  
Architect: KSS Architects
