

PORCELAIN CERAMIC RAINSCREEN

Transpo Center

Maintenance-free Metallic Ceramic5 Façade for Transpo Center

[RNL Design](#) incorporated Ceramic5 panels in a metallic finish to enhance the clean design lines of [Transpo Center](#). Buses from all over the city come here to nest - but so do birds of all kinds, because of the wonderful use of bird friendly landscaping.

Using 2'x4' panels, RNL Design was able to create a facade with scalability for the entire neighborhood to enjoy. Sure - Notre Dame is down the road, but the Transpo Center is a must "bus" stop to check out!

Panel Type: Ceramic5

Architect: RNL Design
