

Swisspearl Clinar 6 + Clinar 4

Economical, esthetic and durable

Clinar 6

Six standard formats can be installed with continuous or staggered vertical seams to create a wide range of design options. For example, at total of 28 different designs are possible with Clinar 6. Creativity can be unlimited. Installation and design details for durable Clinar formats are based on trusted and efficient construction techniques that can be mounted by just a single worker.

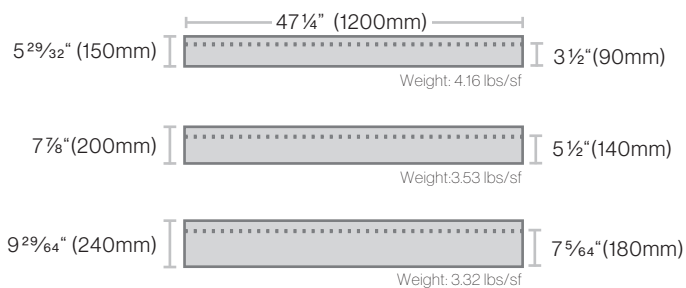

Clinar 4

Clinar fiber cement panels are produced industrially as ready-to-install. Different formats and patterns, as well as the attractive range of colors, allow for a customized design. Measuring only 4 mm thick, the panels impart an elegant lightness to a façade with a staggered arrangement.
