

Patina Inline NXT

Milled grooves for a dimensional effect

Patina Inline NXT is a through colored fiber cement panel with a linear milled surface structure. The indentations create an atmospheric play of shadows, which changes depending on the time of day and viewing angle. A fine patina will form on the surface over time. The restrained colors create a stylish harmony in combination with the milled surface.

Patina Inline NXT Availability:

No minimum order quantity for 8mm thick panels in standard colors. The minimum order quantity for 8mm thick accent color panels is 250 m².
