

Patina Original NXT

Subtle patinas, evolving over time

Patina Original NXT is a through-colored material that is anything but ordinary. Its fine sanding lines and colors evolve beautifully over time, giving it a natural, authentic look. As the panel develops a beautiful patina over time, it gives the building a unique, aesthetic appearance with small, subtle variations in the surface. As the seasons change, a subtle patina is created that tells the story of the building and brings its facade to life.

Patina Original NXT Availability:

No minimum order quantity for 8mm thick panels.
The minimum order quantity for 12mm thick panels is 550 m² for both standard and accent colors.

To request samples of Swisspearl Patina Original NXT please contact Cladding Corp at **(888) 826-8453** or **info@claddingcorp.com**
