

Patina Structure NXT

A Brushed Structure Plays With
Shadow and Light

Subtle linear grooves define the surface of Patina Structure NXT revealing a refined, natural rhythm. As light grazes the material shadows dance across the texture, enhancing the architectural depth of each panel. Each color variation offers a dynamic interplay of shadows with the course of daylight and perspective. The brushed texture of these panels convey both strength and sophistication, combining a natural look with modern design sensibilities. Patina Structure NXT provides a tactile finish and various aesthetic possibilities.
