

SWISSPEARL® FIBER CEMENT RAINSCREEN

EFSC Health Science

Rainscreen Features to Create A Modern Look on Campus

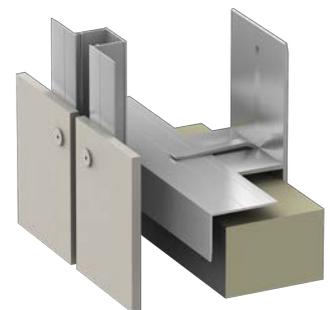

[BRPH Architects](#) developed a comprehensive building program that responds to the needs of [Eastern Florida State College](#) (EFSC). EFSC has highly affordable tuition and ranks 18th nationally in lowest tuition among all public colleges and universities, which plays a role in helping students stay enrolled and graduate on time.

The Health Science building incorporated a Swisspearl® black panel, which is a key architectural feature across over five buildings on campus. BRPH has found great success by using Swisspearl® on these buildings and in the process has created a new modern look for the campus.

System Type: Alpha Hci.10 System

Panel Type: Swisspearl®

Architect: BRPH Architects
