# Swisspearl Terra

Reminiscent of earth tones, for a warm, earthy look.

Terra is a grey-based fiber cement panel with a translucent, strongly pigmented coating. The finely coordinated colors are reminiscent of earth tones. Terra gives the building facade an earthy, warm look. With Terra, buildings are able to merge with their natural environment.

To request samples of Swisspearl Terra please contact Cladding Corp at **(888) 826-8453** or info@claddingcorp.com
