

TERRACOTTA RAINSCREEN

College of Marin Academic Building

Campus Building Boasts New Terra5 Rainscreen and Sunscreen Facade

[Mark Cavagnero Associates](#) have been creating award winning projects and the [College of Marin](#) Academic building is no exception. [Terra5](#) terracotta sunscreens are horizontally floating in front of the buildings stunning glass windows.

Situated in the heart of the campus, this building uses strong shapes in soft colors with lots of glass. The surrounding hillsides and classic California topography snuggle this inspiring and functional piece of artwork. Students are inspired to learn by the setting that has been created.

Panel Type: Terra5

Architect: Mark Cavagnero Associates
