

TERRA COTTA RAINSCREEN

# Tukwila King County Library

*Award Winning Library Clad in Terra5 Rainscreen Panels*

Perkins + Will provided King County with a stunning new community hub via the new Tukwila Library. The featured facade material was Terra5 terracotta rainscreen panels. Using a random pattern of a few grey colored terracotta panels, the building is lively and ready to serve the minds of all who want to be inspired. The design showcases natural elements of the Pacific Northwest - both inside and out. The terracotta's warmth is underscored by long plank shapes that complement the building's entrance and glass wall features.

Panel Type: Terra5  
Architect: Perkins + Will
