

## Special remarks

**Carat, Reflex, Planea, Zenor:**  
Also available in 12 mm thickness.

**Vintage, Vintage-Reflex, Avera:**  
Only available in 8 mm thickness.

**Nobilis, Terra:**  
These 12 mm panels are only available in size 2510×1250 mm.

**Gravial:**  
Type L: Milled slots parallel to the long direction.  
Type Q: Milled slots parallel to the short direction.

**Gravial:**  
Only available in 12 mm thickness.

## General information

The various finishes and colours allow the unique character of the Swisspearl panels to be expressed in an almost endless diversity. The carefully chosen colours, emphasize the unmistakable aesthetics of the material.

- CARAT** Unique natural look and timeless beauty. The translucent lightly pigmented finish adds a distinguished expression.
- GRAVIAL** Unique interplay of light and shadow. The linear, geometrical grooved surface offers countless options for making a special statement.
- VINTAGO** Naturally authentic, rough and unique. The sanded surface highlights the purity of the fibre cement panel.
- AVERA** Authentic and vibrant appearance. The transparent coating lets the original natural look of the fibre cement shine through.
- REFLEX** Shiny look with metallic character. The iridescent surface coating gives the panels a sophisticated look.
- NOBILIS** Authentic fibre cement look. The translucent lightly pigmented surface highlights the fibre cement texture in its natural beauty and elegance.
- TERRA** Earthy and warm atmosphere. The finely coordinated colours are a reminiscent of earth tones and gives the building envelope an earthy, natural look.
- PLANEA** Fresh and colourful creativity. The matte and smooth finish emphasizes the clear, bright and strong colours for an overall intense appearance.
- ZENOR** Zenor has an opaque coating and creates a simple elegance, due to its homogeneous surface.
- PATINA ORIGINAL NXT** Lightly sanded, it stylishly showcases the character of the material. Their structure allows the fibre and the strong character properties of the raw materials work.
- PATINA ROUGH NXT** The rough surface creates a varied appearance with many facets.
- PATINA INLINE NXT** Light and shadow in the rhythm of time. Linear milled indentations create a dynamic appearance that changes depending on the time of day and viewing angle.
- PATINA STRUCTURE NXT** Structure created between shadow and light. Transforms fibre cement into a visual and tactile experience.

Authentic range:

Swisspearl Patina NXT design line is a range of authentic, through-coloured facade boards with unique features. Each facade board is as individual as the nature itself. Each facade board comes with slight variations in structure and surface to accommodate the demands from architects and builders across the world, who are looking for a characteristic texture and a vibrant expression. These facade boards will patinate beautifully over time, adding an aesthetic look to the building design with some unique and subtle variations on the surface.

— Coating information (without mechanical surface treatment)  Coating information (with mechanical surface treatment)  
 Additional mechanical surface treatment (optional)  
— Information on the colouring of the base panel  
 **High-Resistant Coating:** All Carat, Nobilis and Zenor colours are also available with HR-Coating, Vintago, Avera and Reflex

**HR** **High-Resistant Coating:** All Carat, Nobilis and Zenor colours are also available with HR-Coating. Vintago, Avera and Reflex are equipped with a transparent HR-Coating as standard. The coating is particularly weather-resistant, scratch-resistant and allows dirt and graffiti to be easily removed. It serves a plus of protection and therefore opens up more possibilities and space for architectural visions. Even if the environment is challenging, the result is a clean and long lasting surface.

A detailed list of the NCS-Codes for all products shown can be found via the QR-Code.

The printed colours may differ from the original shade of the colour. To see the exact colour, and when matching up colours on adjacent parts of a building, one must use the original panel samples. The natural ingredients used in the fibre cement panels will to some extent determine the unique character of the material. The intensity and colour tone may vary slightly depending on the production batch.
