

Fiber Cement Rainscreen

SWISSPEARL

1000 S Capital Street

ACM Project

1000 South Capitol Street SE in Washington, DC is a striking luxury condominium development designed by Shalom Baranes Associates, one of the region's leading architects known for innovative rainscreen applications. The building features Swisspearl HDfC fiber cement panels, offering a refined, low-maintenance aesthetic that complements the sleek urban design. ECO Cladding provided the engineered subframing system, supporting both the HDfC and ACM (aluminum composite material) panels used throughout the façade. This high-performance cladding approach ensures long-term durability, thermal efficiency, and visual sophistication in a high-profile location.

Panel Type: Swisspearl®
Architect: Shalom Baranes Associates
