

PORCELAIN CERAMIC RAINSCREEN

Quakertown High School

Energy-efficient Rainscreen High School Renovation and Reclad

Completed in early 2015, Cladding Corp provided our [Ceramic5](#) rainscreen solution with the [PETRA "Mountains" Collection](#) porcelain ceramic panels installed using ECO Cladding's [Alpha Hci.20](#) engineered rainscreen sub-framing system. Swisspearl's (Eternit Auria C) fiber cement lap siding provides a bold complement to the Ceramic5 panels. The fiber cement siding is supported with ECO Cladding's [Alpha Hci.14 System](#).

The Architectural Studio's modern design for the school's facade was installed by CHM Contracting.

System Types: Alpha Hci.20 System

Alpha Hci.14 System

Panel Types: Ceramic5 PETRA

Eternit Auria C

Architect: The Architectural Studio
