

SWISSPEARL® FIBER CEMENT RAINSCREEN

Petersburg YMCA – Petersburg, VA

Cutting Edge Design and Reduced Thermal Footprint

The YMCA of Petersburg, Virginia was redesigned, inside and out to meet the ever-changing needs of the diverse community it serves. Along with meeting new building code requirements, the YMCA was also looking to achieve greater efficiencies that would reduce operating costs.

Enteros Design Architects was selected to rework this vital community space. The addition of the Swisspearl® fiber cement rainscreen to the building's exterior not only helps to reduce the building's thermal footprint but also provides a sleek, modern, and exciting new look.

Panel Type: Swisspearl® Fiber Cement

Architect: Enteros Design Architects
