

## TERRACOTTA RAINSCREEN

Regional Medical Center – Manchester, IA

*A sustainable approach to design.*

The Regional Medical Center located in Manchester, IA is a 2-story addition to an existing hospital anchored by a new patient bed unit and specialty clinic. The exterior design was carried through to the interior which reflect warm neutral colors connecting with the rural landscape. Renewable natural materials such as the double flat-lock zinc and Cladding Corp's Terra5 clay terracotta panels were utilized as part of the sustainable approach to design.

Panel Type: Terra5  
Architect: Invision Architecture
