

TERRA COTTA RAINSCREEN

SFPUC Southeast Treatment Plant - San Francisco, CA

Terracotta Façade for a Complex Renovation to an Outdated Public Works Facility

SFPUC, San Francisco Public Utilities Commission will replace its existing, outdated solids treatment facilities with new biosolids digester facilities. [MWA Architects - SF](#) was engaged to renovate the aging facilities, some of which are structurally unsound and date back to the 1950's. Cladding Corp's Terra5 TC18 rainscreen was selected with an ECO Cladding F1.45 adjustable and thermally-broken attachment system. The campus design incorporates two colors for the project.

Panel Type: [Terra5 TC18](#)
System: ECO Cladding F1.45
Architect: MWA Architects
