

TERRA COTTA RAINSCREEN

St. John's University – Collegeville, MN

A vibrant community building modeling a stunning terracotta sunscreen

[CSNA Architects](#) selected Terra5's louver sunscreens on The Learning Commons at Saint John's University. The building is a vibrant community commons focused on 21st century pedagogy and social learning trends. This facility is an energetic melding of formal and informal learning, casual dining, retail sales, socialization and multi-purpose venues providing a student commons with books for learning - at the heart of Saint John's University campus. The building's red terracotta sunscreen and other facade materials echo from across the campus.

Panel Type: [Terra5](#) Sunscreen
