

238 Linden Avenue – Ithaca, NY

Energy-efficient Façade for College-accessible Housing in Ithaca

[Ikon 5 Architects](#) continues to turn to Swisspearl's high-quality fiber cement rainscreen products for their latest residential project, 238 Linden Avenue. This multi-family residential project is a block away from Cornell University and the growing demand for housing has created many opportunities for owners to make improvements around town. The facade incorporated four different Swisspearl colors including three metallic Reflex colors and a thermally broken ECO Cladding Hci.10 subframing system. College housing... taken to a whole new level!

Panel Type: Swisspearl® REFLEX

System: [ECO Cladding Hci.10](#)

Architect: Ikon 5 Architects
