

## 839 Beacon Street – Boston, MA

*Contemporary Custom Color Façade for Mixed Use Residence*

[Prellwitz Chilinski Associates](#) reinterpreted Boston's typical brick and bay townhouses with a striking new approach for this apartment and retail space designed for working professionals. Swisspearl fiber cement panels were incorporated in three custom colors and an ECO Cladding VZ.10 subframing system provided the subframing backbone for the building's contemporary facade. The sidewalk level of the building is highlighted with an attractive retail front and the residential stories are angled creating a striking pattern and movement.

Panel Type: Swisspearl®  
System: [ECO Cladding](#) VZ.10
