

AC Hotel Miami Dadeland - Miami, FL

Located adjacent to Dadeland Mall in the heart of Miami's thriving Dadeland district, AC Hotel Miami Dadeland blends contemporary hospitality with the refined simplicity of European-inspired design. Designed by DLR Group of Chicago, the architecture reflects the AC Hotel brand's commitment to clean lines, modern materials, and timeless European influences, creating an inviting destination for both business and leisure travelers.

A defining feature of the project is the installation of approximately 9,000 square feet of Swisspearl High-Density Fiber Cement (HDFC) panels. Two complementary panel colors were carefully arranged to create a subtle striped pattern across the façade, adding visual depth and texture while reinforcing the building's contemporary character.
