

Aslin Brewery and Beer Garden - Herndon, VA

Aslin Brewery in Herndon, Virginia, was designed by Form Design LLC and features a striking rainscreen facade using Swisspearl® HDPC panels in vibrant blue alongside the grey Patina Inline series. The Inline panel's gang-routed linear texture adds depth and dimension, contributing to a bold and modern exterior. This thoughtful facade design complements the brewery's rooftop and ground-level beer garden spaces, creating a lively and inviting atmosphere. The project has been well received by the local community, becoming a standout destination in the area.

Panel Type: Swisspearl®
Architect: Form Design LLC
