

# Buffalo AKG Art Museum- Buffalo, NY

*Swisspearl Soffit Promenade for Buffalo's AKG Art Museum*

Led by OMA with Cooper Robertson, this ambitious undertaking marks the third expansion in the museum's history. A critical part of the renovation -the need to link the historic museum with a new exhibition space. The answer came in the form of a dramatic pedestrian promenade, complete with a soffit detail with Swisspearl Largo panels in the REFLEX Series.

Under the OMA and Cooper Robertson partnership, the primary objective of the project was to add 30,000 square feet of exhibition space, not only to house the museum's extensive collection but also to create state-of-the-art areas for presenting special exhibitions. By incorporating several visitor amenities, the newly built structure aims to provide an enhanced art-viewing experience.

**Panel Type:** Swisspearl®  
**System:** Cladding Corp Subframing System  
**Architect:** OMA / Shohei Shigematsu/ Cooper
