

Stephen Olney Elementary School – North Providence, RI

New elementary school utilizes Swisspearl high-density fiber cement in Reflex Cobalt Blue

Stephen Olney Elementary School was one of three schools opened 84 years ago in North Providence. Since then, the school has undergone two major renovations, in 1953 and in 1960. The goal of the newly constructed state-of-the-art building, designed by [SLAM Collaborative](#) was to excite and motivate students to learn. The school was completely rebuilt utilizing Swisspearl high-density fiber cement in Reflex Cobalt Blue.
