

SWISSPEARL® FIBER CEMENT RAINSCREEN

Long Reach Tennis Club

Fiber Cement Entrance Feature Adds Color and Drama

Long Reach Tennis Club's new club location helps inspire all who enter! [GTM Architects](#) incorporated [Swisspearl®](#) fiber cement rainscreen panels to create a dynamic entrance for the formerly-conservative tennis club. All eyes are fixed on the entrance's vivid blue [Swisspearl®](#) fiber cement rainscreen panels. The multi-color white and gray slats are a perfect backdrop for Long Reach Tennis Club signage. Maybe it's not one of Swisspearl's largest applications, but it is definitely an eye-catcher.

Panel Type: Swisspearl®
Architect: GTM Architects
