

TERRA COTTA RAINSCREEN

Craig-Lee Hall – Rhode Island College – Providence, RI

A Facade that adds Thermal Comfort and Visual Appeal

Rhode Island College Craig-Lee Hall addition was designed by [LLB Architects](#). Swisspearl® fiber cement rainscreen panels were selected as a design feature for the entrance and also along the rooftop, where slat fiber cement panels were used to cover HVAC systems. Terra5 Terracotta Sunscreen Baguettes were also utilized in the overall facade, providing natural thermal comfort for the interior while still letting in needed natural light.

Panel Type: [Terra5](#) & [Swisspearl](#)

Architect: LLB Architects
