

TERRA COTTA

ERCOT Taylor Operation Center - Taylor, TX

ERCOT Taylor Center Features Terra5 Terracotta Rainscreen for Enhanced Resilience

Panel Types: [Terra5®](#)

The ERCOT Taylor Operations Center, home to the Electric Reliability Council of Texas Control Center, features a Terra5 terracotta rainscreen by Cladding Corp. Designed as a mission-critical facility, the building required a high-performance façade system. The terracotta rainscreen provides a pressure-equalized wall assembly, helping to protect the high-velocity curtain wall system during extreme weather events. This strategic design ensures long-term durability and resilience for the vital infrastructure within.
