

## PORCELAIN STONE RAINSCREEN

## FNBC Community Bank – Jonesboro, AR

*Woodgrain Cladding Feature for FNBC Community Bank*

FNBC has been serving Arkansas communities for the last 100 years with their success rooted in its heart for service and love for everything local. With competition at a premium in a vibrant, growing city like Jonesboro, FNBC is up against many other financial institutions in the area, so distinguishing itself in the market was key. With the exterior elevations, the branch comes across as a much more striking multilevel building than the 5,500 square feet would typically suggest. Showing that one doesn't need colossal scale, FNBC proves how the branch can be very inviting through smart design. Cladding Corp's high-performance [Ceramic5 Timber Series](#) was utilized in this unique project.
