

# PS 347 – Bronx, NY

*Colorful Design Meets Lasting Performance*

Designed by Mitchell Giurgola Architects, PS 347 in the Bronx showcases a bold and inspiring façade using Swisspearl® fiber cement panels. A vibrant mix of colors adds character and reflects the school's creative spirit, making the building a lively focal point in the community. Swisspearl panels were chosen not only for their dynamic visual impact but also for their long-lasting performance. Their ventilated rainscreen system boosts thermal efficiency, resists harsh weather, and requires little maintenance - making them an ideal choice for a high-use educational setting. PS 347 is a standout example of how thoughtful design and durable materials can shape engaging, resilient learning environments.

**Panel Type:** Swisspearl®
