

SIX11 - 611 E University Ave - Ann Arbor

Six11 (611 E University Ave, Ann Arbor) is a striking 13-story student housing tower designed by WDG Architecture just steps from the University of Michigan campus. The contemporary façade features Swisspearl HDFC fiber cement panels in sophisticated grey tones at street level, transitioning into rich brick above—both systems expertly supported by ECO Cladding's adjustable rain-screen attachment solution. ECO's engineered system ensured seamless integration of materials, offering thermal efficiency and long-lasting durability to meet university housing standards. This high-profile development showcases how ECO Cladding enhances architectural design while delivering performance and aesthetic excellence.

Panel Type: Swisspearl®
System: Cladding Corp Subframing System
