

TERRA COTTA SUNSCREEN

University of Arkansas Parking Garage – Fayetteville, AR
An award-winning modern design for a University Parking Garage

In preparation for Fall 2010 semester, installation of the University of Arkansas Garland Avenue Parking Garage incorporated a unique Terra5 baguette sunscreen. The project has been an award winner and inspired numerous other projects. A Vci.45 subframing system formed the basis for all the rainscreen attachments, including a custom-tailored sunscreen assembly solution, engineered by ECO Cladding.

System: [ECO Cladding Vci.45](#)
Panel Type: Terra5
Architect: HLKB – Des Moines
Installer - EDGE
