

TERRA COTTA SUNSCREEN

U of Iowa Brain Sciences Building - Iowa City, IA

A unique sunscreen detail to complement rainscreen façade on campus

For the new Department of Psychological and Brain Sciences building at the University of Iowa, [BNIM Architects](#) incorporated an engineered Terra5 rainscreen and sunscreen assembly supplied by Cladding Corp. For this project, a grey color pallet was selected in order to coordinate with the overall campus master plan. In addition to the exterior rainscreen facade, this installation also included a unique and defining sunshade detail at the top portion of the windows, providing both thermal and aesthetic elements to the building's design.

Panel Type: Terra5

System: [ECO Cladding Hci.22](#)

Architect: BNIM Architects
