

## TC18

A terracotta rainscreen solution for applications where weight of the facade and project budget call for a thinner, more economical approach. Designed to be a versatile and economical solution for terracotta rainscreen, the TC18 tile format offers the elegance and beauty of terracotta in a rainscreen package to fit any budget.

TC18 is redefining the rules of terracotta cladding in North America, without sacrificing the impact resistance of a double-skinned tile format.

Paired with a horizontal rail system, TC18 is uniquely suited for projects where the depth of the ventilated cavity is an issue, offering limitless design possibilities for both retrofit and new-build construction.

## Standard Sizes

	Heights	200mm (7.87")	250mm (9.84")	300mm (11.81")	350mm (13.87")	400mm (15.75")
Lengths	600mm (23.62")	X	X	X	X	X
	900mm (35.43")	X	X	X	X	X
	1200mm (47.24")	N/A	X	X	X	X

TC18 panels come in the same consistent thickness (18mm / 0.71")

Terra5 has hundreds of shapes to choose from or create your own design. Lines, Grooves, and beyond...
